

AFP-01 Flattening & Matting Agent

Description

AFP-01 is a special blend of solvents, flattening agents and proprietary polymers additive to aid in lowering the gloss of solvent based polyurethane finishes. Varying levels of gloss can be created by the level of AFP-01 added and controlling the thickness of the spray. AFP-01 is a great tool for creating the popular flat clear or "Rat Rod" flat single stage finish. Check local regulations for compliance before using.

Components

- AFP-01 Universal Flattening and Matting Agent
- Any solvent based coating

Mixing Instructions

1K (No activator required) Finishes

Add 10-50% by volume AFP-01 to your 1K product mix well then reduce as needed with appropriate thinner for the product. (Check 1K data sheet for appropriate thinner)

2K Finishes (Activator Required)

Activate as recommended by the 2K finish data sheet then add 10-50% by volume AFP-01 then reduce as needed to spray.

Application

Apply medium wet even coats with 50% overlap between coats. Guns equipped with 1.2-1.5 mm fluid tips are recommended. Follow color or clear manufacturer's instructions for film builds. Excessive film build will increase gloss and slow dry. Spray a test panel to confirm look before spraying object.

Clean Up

Clean up as normally recommended for your solvent based coating recommendations.

Read MSDS of all components before using. Use proper personal protective equipment at all times. For use by professionally trained painters. **KEEP OUT OF REACH OF CHILDREN.** Bayou Innovations, LLC warrants that its products are free from defects at time of shipping.
