

ARE-66 Pro-Flow Flow Enhancer & Retarder

Description

Pro Flow is a special blend of solvents and polymer additives to improve flow and leveling of solvent based paints and coatings. Pro Flow contains a slow yet diffusible solvent to slow the evaporation rate of the system making it easier to maintain a wet edge for painting large objects or painting in hot climates. Does not adversely affect cure for 2K Polyurethanes.

Components

- ARE-66 Pro Flow Leveling and Flow Enhancer
- Any solvent based coating

Mixing Instructions

Mix up to 4 ounces of Pro Flow ARE-66 for each sprayable quart (32 ounces or 946 ml) of your solvent based paint or coating. Mix gently then spray as usual.

Application

Apply per recommendations of your solvent based paint or coating technical data sheet. Spray a test panel to confirm desired effect before painting.

Clean Up

Clean up as normally recommended for your solvent based coating recommendations.

Read MSDS of all components before using. Use proper personal protective equipment at all times. For use by professionally trained painters. **KEEP OUT OF REACH OF CHILDREN.** Bayou Innovations, LLC warrants that its products are free from defects at time of shipping.
